

Cloud Services

Your Journey to the Cloud Starts Here

Let CBTS be your trusted partner on the road to integrating your organization into the cloud.

Many businesses that adopted cloud computing have experienced an operational paradigm shift resulting in business agility, cost savings and IT innovations. According to Gartner, 77% of businesses will adopt cloud computing beyond 2017.

Transform Your Business Outcomes

Businesses are discovering that transitioning to the cloud can help them achieve major business outcomes such as:

- Reducing capital expenses on IT infrastructure
- Removing the infrastructure management burden
- Tackling your rapid storage and backup growth needs
- Accelerating your go-to-market speed
- Creating flexible workloads and an agile application development environment for faster delivery
- Enabling IT modernization and innovation to gain a competitive edge

CBTS is Your Cloud Consultant

CBTS can be your one-stop shop and trusted partner on the journey to the cloud. We work with our clients to identify their business goals and develop ways to accomplish them. As your cloud consultant, we provide end-to-end design, build, and run services including:

- Understanding your business goals and priorities
- Assessing your IT environment for cloud readiness
- Evaluating your security posture
- Identifying strategic business applications
- Creating a cloud roadmap
- Designing, implementing and supporting a custom cloud solution for your specific business needs
